SUMMARY

Recent Information Security graduate with hands-on knowledge of Linux, networking, and system administration through personal projects and homelab practice. Familiar with software installation, troubleshooting, system monitoring, and basic network management. Passionate about IT infrastructure and eager to grow in an IT Support/System Support role.

EDUCATION

Academy of Cryptographic Techniques

• Graduated: October, 2025

Bachelor Degree of Information Security

GPA: 3.53/4.0

WORK EXPERIENCE & PROJECTS

Security & Monitoring Homelab (*Personal project*)

Jan 2026

neyugniat.hashnode.dev/homelab-monitoring-and-security-stack

Researched and implemented infrastructure monitoring and security systems using multiple tools:

- Deployed Prometheus and Grafana for system performance monitoring.
- Deployed Wazuh for log collection and analysis.
- Practiced basic SIEM, Endpoint Security, and SOC models.
- Implemented pfSense Firewall and Suricata IDS/IPS in a lab environment.
- Configured and troubleshooted networking, firewall, and agent/exporter connectivity issues.
- Simulated basic attack scenarios using Kali Linux to observe security alerts.

DCNET Telecom - Intern IT Support

Nov 2024 - Feb 2025

- Researched FreeRADIUS and RADIUSDesk for network authentication systems.
- Implemented internal network user authentication using IEEE 802.1X.
- Deployed Captive Portal solutions for internal Wi-Fi networks on MikroTik routers, UniFi APs, and TP-Link APs.
- Assisted in troubleshooting and supporting computer software/hardware issues.

Dynamic VLAN with RADIUS (*Personal project*)

Oct 2024

neyugniat.hashnode.dev/dynamic-vlans-with-radius

Implemented dynamic VLAN assignment with port-based authentication using RADIUS on Windows Server 2019 and researched services including AD DS, AD CS, DHCP, DNS and NPS.

- Configured automatic IP allocation based on VLAN assignment according to user authentication via RADIUS.
- Applied policies configured in NPS for different authenticated user accounts.

SKILLS & CERTIFICATE

System & Network: CCNA Knowledge, TCP/IP, DNS, DHCP, LAN/WAN, Firewall, VPN, Networking.

Monitoring & Security: Zabbix, Prometheus, Grafana, Wazuh, Suricata, pfSense.

English: Intermediate level, TOEIC Certificate 740 - Listening & Reading.

Operating System & Virtualization: Linux, Windows Server, VMware.

Database: Basic MySQL & SQL Server.

Programming: Java, Python.
